You Are Invited To Our 2nd Annual “Sink Our Ship” Party

May Day, May Day, all hands on deck for the 2nd Annual “Sink Our Ship” party at the Pelican Yacht Club on Saturday, November 17th. This fundraising event benefits the Sea-Life Habitat Improvement Project (also known as SHIP). SHIP is a 501.c.3 public charity with a mission to deploy a large Navy type ship off the Treasure Coast as an artificial reef.

“This annual fundraising event is our chance to update the community on our progress in obtaining a ship for a new artificial reef,” said Andy Brady, President of SHIP. “We truly support all of the artificial reef and oyster reef restoration projects on the Treasure Coast and this project is designed to complement those ongoing projects. We have assembled a phenomenal board of directors and planning committee. There is no doubt that we have the right people at the table to reach our goal.” It is anticipated that this will be a 6-8 year project and will rival projects such as the Spiegel Grove and Vandenberg Reefs in the Florida Keys.

This party will feature guest speaker Mike Campbell, the Lee County Artificial Reef Coordinator and Executive Director of Lee Reefs, who successfully deployed the USCG Mohawk as an artificial reef this past summer off the Coast of Lee County. Guests will also enjoy an ensemble from the Ft. Pierce Jazz Society and fine dining at the lovely Pelican Yacht Club. There will also be many silent auction & raffle items. The party begins at 6pm. Tickets are \$50 per person and available at the Ft. Pierce City Marina, Whiticar Marine Service @ Harbortown Marina and St. Lucie Outboard Marine. You can RSVP by calling April Price at (772) 285-1646, e-mail; shipinc.slc@hotmail.com or go to our website at www.SinkOurShip.org. See you at the party!

Sea-Life Habitat Improvement Project, Inc., is a 501(c)3 public charity.
